ARTICLES

Rapid Arctic Sea Ice Loss on the Synoptic Time Scale and Related Atmospheric Circulation Anomalies ZHUO WANG, JOHN WALSH, SARAH SZYMBORSKI, AND MELINDA PENG	1597–1617
Do CMIP5 Models Show El Niño Diversity? JIE FENG, TAO LIAN, JUN YING, JUNDE LI, AND GEN LI	1619–1641
The Efficiency of the Hadley Cell Response to Wide Variations in Ocean Heat Transport. M. CAMERON RENCURREL AND BRIAN E. J. ROSE	1643–1658
Role of Maritime Continent Land Convection on the Mean State and MJO Propagation MIN-SEOP AHN, DAEHYUN KIM, YOO-GEUN HAM, AND SUNGSU PARK	1659–1675
Reduction in Ocean Heat Transport at 26°N since 2008 Cools the Eastern Subpolar Gyre of the North Atlantic Ocean. HARRY L. BRYDEN, WILLIAM E. JOHNS, BRIAN A. KING, GERARD MCCARTHY, ELAINE L. MCDONAGH, BEN I. MOAT, AND DAVID A. SMEED	1677–1689
Ⓜ Near-Global Atmospheric Responses to Observed Springtime Tibetan Plateau Snow Anomalies. SHIZUO LIU, QIGANG WU, STEVEN R. SCHROEDER, YONGHONG YAO, YANG ZHANG, TONGWEN WU, LEI WANG, AND HAIBO HU	1691–1706
Ⓜ Inverse Modeling of Global and Regional Energy and Water Cycle Fluxes using Earth Observation Data. CHRISTOPHER M. THOMAS, BO DONG, AND KEITH HAINES	1707–1723
Exploring Controls on Tropical Cyclone Count through the Geography of Environmental Favorability KIMBERLY A. HOOGWIND, DANIEL R. CHAVAS, BENJAMIN A. SCHENKEL, AND MORGAN E. O'NEILL	1725–1745
Ⓜ Diurnal Cycle of the Asian Summer Monsoon: Air Pump of the Second Kind. GUIXING CHEN	1747–1775
Ⓜ Diagnostic Metrics for Evaluating Model Simulations of the East Asian Monsoon JUAN LI, BIN WANG, AND YOUNG-MIN YANG	1777–1801
Spatiotemporal Variability of Tropical Cyclone Precipitation Using a High-Resolution, Gridded (0.25° × 0.25°) Dataset for the Eastern United States, 1948–2015 JOSHUA C. BREGY, JUSTIN T. MAXWELL, SCOTT M. ROBESON, JASON T. ORTEGREN, PETER T. SOULÉ, AND PAUL A. KNAPP	1803–1819
Conserving Land–Atmosphere Synthesis Suite (CLASS) SANAA HOBEICHI, GAB ABRAMOWITZ, AND JASON EVANS	1821–1844
Ⓜ Role of the Surface Boundary Conditions in Boreal Spring on the Interannual Variability of the Multistage Evolution of the East Asian Summer Monsoon HYOEUN OH AND KYUNG-JA HA	1845–1861
Equilibrium- and Transient-State Dependencies of Climate Sensitivity: Are They Important for Climate Projections? OLIVIER GEOFFROY AND DAVID SAINT-MARTIN	1863–1879
Atmospheric Radiative Processes Accelerate Ground Surface Warming over the Southeastern Tibetan Plateau during 1998–2013. PENG JI, XING YUAN, AND DAN LI	1881–1895
Ⓜ Impacts of North Pacific Subtropical and Subarctic Oceanic Frontal Zones on the Wintertime Atmospheric Large-Scale Circulations. JING HUANG, YANG ZHANG, XIU-QUN YANG, XUEJUAN REN, AND HAIBO HU	1897–1914
Ⓜ Climate Models Permit Convection at Much Coarser Resolutions Than Previously Considered. JESÚS VERGARA-TEMPRADO, NIKOLINA BAN, DAVIDE PANOSSETTI, LINDA SCHLEMMER, AND CHRISTOPH SCHÄR	1915–1933
Ⓜ Subseasonal Forecast Skill over the Northern Polar Region in Boreal Winter HAI LIN	1935–1951
Fundamental Behavior of ENSO Phase Locking. HAN-CHING CHEN AND FEI-FEI JIN	1953–1968
Summertime Surface Wind Variability over Northeastern North America at Multidecadal to Centennial Time Scales via Statistical Downscaling ETOR E. LUCIO-ECEIZA, J. FIDEL GONZÁLEZ-ROUCO, ELENA GARCÍA-BUSTAMANTE, JORGE NAVARRO, CRISTINA ROJAS-LABANDA, AND HUGO BELTRAMI	1969–1990

<p>Estimating the Effective Radiative Forcing of Contrail Cirrus MARIUS BICKEL, MICHAEL PONATER, LISA BOCK, ULRIKE BURKHARDT, AND SVENJA REINEKE</p> <p>Strengthened Connection between Springtime North Atlantic Oscillation and North Atlantic Tripole SST Pattern since the Late 1980s SHANGFENG CHEN, RENGUANG WU, AND WEN CHEN</p>	<p>1991–2005</p> <p>2007–2022</p>

Publications of the American Meteorological Society

The BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY is the flagship magazine of AMS and publishes articles of interest and significance for the weather, water, and climate community as well as news, editorials, and reviews for AMS members.

EARTH INTERACTIONS publishes research on the interactions among the atmosphere, hydrosphere, biosphere, cryosphere, and lithosphere, including, but not limited to, research on human impacts, such as land cover change, irrigation, dams/reservoirs, urbanization, pollution, and landslides. *Earth Interactions* is a joint publication of the American Meteorological Society, American Geophysical Union, and American Association of Geographers.

The JOURNAL OF APPLIED METEOROLOGY AND CLIMATOLOGY publishes applied research on meteorology and climatology. Examples of meteorological research include topics such as weather modification, satellite meteorology, radar meteorology, boundary layer processes, physical meteorology, air pollution meteorology (including dispersion and chemical processes), agricultural and forest meteorology, mountain meteorology, and applied meteorological numerical models. Examples of climatological research include the use of climate information in impact assessments, dynamical and statistical downscaling, seasonal climate forecast applications and verification, climate risk and vulnerability, development of climate monitoring tools, and urban and local climates.

The JOURNAL OF ATMOSPHERIC AND OCEANIC TECHNOLOGY publishes research describing instrumentation and methods used in atmospheric and oceanic research, including remote sensing instruments; measurements, validation, and data analysis techniques from satellites, aircraft, balloons, and surface-based platforms; in situ instruments, measurements, and methods for data acquisition, analysis, and interpretation and assimilation in numerical models; and information systems and algorithms.

The JOURNAL OF THE ATMOSPHERIC SCIENCES publishes basic research related to the physics, dynamics, and chemistry of the atmosphere of Earth and other planets, with emphasis on the quantitative and deductive aspects of the subject.

The JOURNAL OF CLIMATE publishes research that advances basic understanding of the dynamics and physics of the climate system on large spatial scales, including variability of the atmosphere, oceans, land surface, and cryosphere; past, present, and projected future changes in the climate system; and climate simulation and prediction.

The JOURNAL OF HYDROMETEOROLOGY publishes research on modeling, observing, and forecasting processes related to fluxes and storage of water and energy, including interactions with the boundary layer and lower atmosphere, and processes related to precipitation, radiation, and other meteorological inputs.

The JOURNAL OF PHYSICAL OCEANOGRAPHY publishes research related to the physics of the ocean and to processes operating at its boundaries. Observational, theoretical, and modeling studies are all welcome, especially those that focus on elucidating specific physical processes. Papers that investigate interactions with other components of the Earth system (e.g., ocean–atmosphere, physical–biological, and physical–chemical interactions) as well as studies of other fluid systems (e.g., lakes and laboratory tanks) are also invited, as long as their focus is on understanding the ocean or its role in the Earth system.

MONTHLY WEATHER REVIEW publishes research relevant to the analysis and prediction of observed atmospheric circulations and physics, including technique development, data assimilation, model validation, and relevant case studies. This research includes numerical and data assimilation techniques that apply to the atmosphere and/or ocean environments. *Monthly Weather Review* also addresses phenomena having seasonal and subseasonal time scales.

WEATHER, CLIMATE, AND SOCIETY publishes research that encompasses economics, policy analysis, political science, history, and institutional, social, and behavioral scholarship relating to weather and climate, including climate change. Contributions must include original social science research, evidence-based analysis, and relevance to the interactions of weather and climate with society.

WEATHER AND FORECASTING (*WAF*) publishes research that is relevant to operational forecasting. This includes papers on significant weather events, forecasting techniques, forecast verification, model parameterizations, data assimilation, model ensembles, statistical postprocessing techniques, the transfer of research results to the forecasting community, and the societal use and value of forecasts. The scope of *WAF* includes research relevant to forecast lead times ranging from short-term “nowcasts” through seasonal time scales out to approximately two years.

For information on becoming an AMS member and/or subscribing to the Society’s journals, visit the AMS website: <https://www.ametsoc.org>.
